

SMS SLIM FLEX

Tilt 40-60" displays with a single touch.

A close-to-the-wall solution for thin displays that gives unrivalled flexibility. The unique construction allows you to tilt thin displays up to 30 kg by hand power alone, completely without tools. The screen can be tilted by as much as 15 degrees, and a backwards-tilt mode is available for

installation and service. Discretion and low weight characterise this product, which protrudes only 15 mm from the wall when in its retracted position.

Delivered in a small, compact package. Finish: silver/white.
