AV over IP Solutions

1080p Encoder (Transmitter) with TVI In, USB, and HDMI

The 726TVI Encoder (Transmitter) adds TVI support, HDMI loopout and USB 2.0 to any Omega or Ultra Series Just Add Power video distribution system.

Add a TVI source to your HD over IP system without the need for an TVI-HDMI converter.

The 726TVI Encoder (Transmitter) encodes a 1080p or lower source device into an IP signal and sends it over the network with ultra-low latency and instant switching; and features image pull and KVM support.

Features

Audio	Line-in for injecting audio	KVM Support	Provides a local keyboard, mouse, touchscreen, gaming controller, joystick, or webcam with remote access to any computer on the system.
HDMI	HDMI pass-through	Scalability	Fully compatible with all Ultra and Omega Series devices
Image Pull	Preview an image from any source or display in any web browser or control system - up to 10 fps
