

PureTools - ProAV Dock PT-HUB-100

A Pro AV Grade Personal Device Docking Solution for Fixed Installations

The PT-HUB-100, a USB-C docking station is tailored to professional environments such as modern offices, hot-desks, and huddle rooms. It would also be a valuable addition to co-working spaces, hotel lobbies, hotel rooms, internet cafes or any multi-user environment where the hardware should be difficult to tamper with, while still retaining a high degree of functionality. Setting itself apart from typical consumer

devices, it offers a seamless plug-and-play user experience with an installation ready enclosure to suit Pro AV expectations. With Dual 4K outputs, USB-C 3.2 Gen2 data transfer, Gigabit Ethernet and 100W power delivery, it's a powerful and versatile choice for the modern style of working.

PT-HUB-100

Pro Installation

Designed for professional settings like modern offices and huddle rooms or consumer users in co working spaces or hotels etc, the PT-HUB-100 USB-C docking station offers a simple, efficient installation that can be completely hidden from the user if required.

Dual 4K Screens

With DP1.4 MST mode support, the PT-HUB-100 enables the connection of up to two 18Gbps screens using a single cable connection. It is a true Plug-and-Play experience for the user at a high level of functionality that will still be relevant for years to come.

Secure Installation Ports

For added security, the fixed installation ports are located at the rear of the device, ensuring that users cannot tamper with connections once it's installed. These ports include two USB-A 3.2 ports for keyboard and mouse dongles, cameras, touch screens, and speakerphones etc, as well as a Gigabit LAN port for reliable and fast networking.

Don't lose access to your only USB-C port!

Many users only have a single USB-C port on their Laptop which they don't want to give up. The PT-HUB-100 therefore offers an additional user device port along side the Upstream port. This means any personal USB-C devices such as USB sticks, headphones, or other peripherals can still be used as usual.

Power?

As well as the power of 10Gbps data transfer associated with USB-C 3.2 Gen2 the PT-HUB-100's alt mode connection also offers powerful 100W PD device charging with a dedicated PSU - enough power for the the dock and your laptop.

Go Green

With the PT-HUB-100, we have made the decision to go for all paper packaging. There is not a single single-use plastic item in the box, we have even gone digital with the manual. At the end of the job, you no longer need to worry about a ton of expensive trade waste that goes straight to landfill - do your bit for the environment with the PT-HUB-100.
