

DEFENDER SERIES+

Smart Power Management

Elevate your AV and IT equipment racks with the SurgeX Defender Series+, designed to exceed your expectations and redefine what's possible in control, protection, and automation.

Advanced power filtration technology delivers pristine power to equipment and maintains peak performance for every project.

Cutting-edge IP-controllability allows remote management of every aspect of AV and IT setup without tedious on-site adjustments. Pinpoint faulty equipment quickly and accurately to resolve issues with minimal disruption.

Multi-stage surge protection goes beyond the basic to safeguard and ensure uninterrupted operation, even in the face of unpredictable electrical disturbances. When a fault is detected, predefined actions are triggered automatically, streamlining workflow and minimizing downtime.

Features:

- ▶ IP-controlled
- ▶ Multi-stage surge protection
- ▶ Swappable power cord with lock
- ▶ 8 individually switchable receptacles and 1 always ON receptacle
- ▶ Remote turn on/off, power cycling, and sequencing
- ▶ Advanced scheduling, AutoPing, and threshold triggered events
- ▶ Remote power management and analytics
- ▶ Seamless integration with third party control systems and SurgeX CONNECT

Part of the SurgeX Protect + Connect family, the DefenderSeries+ includes SurgeX CONNECT, an innovative cloud-based solution that allows for monitoring and managing an entire fleet of compatible SurgeX devices in a single, centralized dashboard.
